Lifestyle™ Sliding Window 00-524BL Centre Locking Latch

New Lockable Window Latch

Due to customer feedback and demand Lidco announces the addition of a new Centre Locking Latch (00-524BL) for the popular Lifestyle™ 112 System Sliding Window. The new lockable latch will also work on the old Lidco 110 System for those fabricators still using this system.

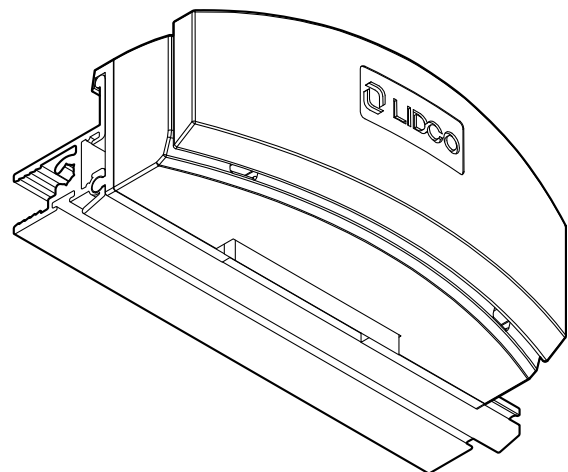

The Centre Locking Latch is fitted to the new interlocking style section (LSS-164) and catches on the alternative glazing bead (LSS-165). The cutting formula remains the same with either interlocking style. The problem of limited clearance between the jamb latch and reveal is overcome with this new latch.
